RECORD SET

The record for League games played consecutively without a loss has now been established. When Erwin Puto of Western Electric Chargers lost to T. Galvin of R.R. Donnelley on October 1, 1963 his record streak of League play without a loss was ended, having lasted 4 years! It was in October 1959 after losing to Bob Soriano of Stewart-Warner that the record started. During that time he played in all but two of his team's matches and won 31 and lost none and had 5 draws. It is a record that will be difficult to match! Congratulations, Erwin!

ROSTERS

This season the two Argonne National Laboratory teams and the two Western Electric teams have established separate rosters. Those on one roster are not eligible to play of the other team.
