VOLUME 22 NUMBER 4

On December 7, 1978 Chess Challenger 10 (owned by Ron Elliott) met the PDP-11 (program kindly supplied by Joe Brozovich) in a match played at Argonne National Laboratory. The Chess Challenger played at level 2 and the program depth was set to 3, i.e. it evaluates 3 half-moves ahead. Both machines were taking about 15 seconds a move so it was closer to a speed chess game than to a regular chess game. The Chess Challenger has some book opening knowledge; the computer doesn't. The results:

Game 1

Notes by David Green:

- a-The program values B over N.
- b-The Queen is trapped.
- c-Trade when ahead.
- d-It can't see BxKNP is OK.
- e-Why not RxB?

After five complete rounds of play the undefeated Wheaton Crusaders lead the Far West Division with four wins and one draw. It looks like the rest of the Division will have to fight for the second place trophy unless someone can knock off the Crusaders.

There is a change in the Far West schedule for rounds 8, 9 and 10. The Far West Division will not engage in the interdivisional position rounds with the Near West Division this year. This decision was agreed upon by myself and Michael Dee, the Near West Division Chairman, when it became evident that it would be extremely difficult to match 9 teams with 8 teams and have all teams play the same number of games. Therefore, the originally scheduled rounds 8, 9 and 10 will be replaced by a three-round Swiss within the Far West Division. The positions in the Swiss will be the teams' positions after seven rounds of play. The home and away teams will be the opposite of the teams original meeting unless this would require one or more teams to travel to all three Swiss round matches. If there is a tie in the standings after the seventh round, the tie will be broken in the following way: 1. Total game points; 2. Score of match between tied teams. If both teams are still tied, the result of their match will be recalculated after dropping the result on board 6. If board 6 was a draw, the result will be recomputed dropping both boards 5 and 6 and so on until there is a winner. If every game was drawn, a coin toss will determine the teams places in the Swiss.

The pairings for rounds 8, 9 and 10 are shown below.

Round 8

1st place vs 5th place
2nd place vs 6th place
3rd place vs 7th place
4th place vs 8th place

Round 9

Winner (1 vs 5) vs Winner (3 vs 7)
Winner (2 vs 6) vs Winner (4 vs 8)
Loser (1 vs 5) vs Loser (3 vs 7)
Loser (2 vs 6) vs Loser (4 vs 8)

Round 10

Winners of rounds 8 and 9.
Teams with one win and one loss in rounds 8 and 9 that didn't play before in Swiss.
Losers of rounds 8 and 9.

The final standings in the Division will be determined by the combined results of the seven-round Round Robin and the three round Swiss. So Good Luck and may the best teams win!
