Volume 33
Bulletin 4

January, 1990

This year's banquet will be held at Harvey's Prime Rib in Westmont on June 8, 1990. Please mark your calendars. Complete details will appear in a later bulletin.

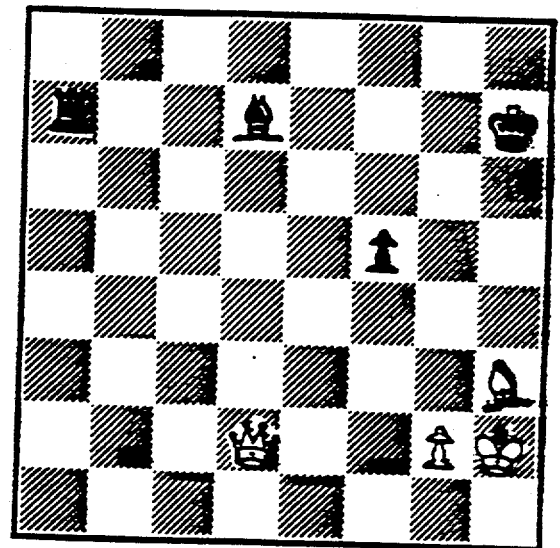

THE 2 SQUARES COLUMN Marv Cox "If two (or more) squares are attacked more times than they are defended, they may fall."

In the diagram above the square e6 is attacked by the white knight and guarded by the black king. Square d5 is attacked by the white pawn on d4 and defended by the black pawn on e6. Thus d5 and e6 are attacked a total of twice and defended only once. The black pawn on e6 doesn't count as a defender because it occupies one of the attacked 2-squares.

1. N x p

Black cannot retake or he will lose his rook. My uncle said a sacrifice to set up a fork or a pin or a swish-en-zug often occurs in a 2-square attack as in the above very simple example.

Want to wrap up a won game without a long ending having possibility of error? In the above diagram use the 2-squares approach. Squares d7 and f5 are attacked twice (by the white queen and the white bishop) and guarded only once (by the black rook). The black bishop does not count as a defender because it occupies one of the 2-squares.

1. Q x b ch r x Q
2. B x p ch k - h6
3. B x r

and an easy win. My uncle always told me to knock out a defender and the defense will fall.
