Our Awards Banquet this year was what we've grown accustomed – but, still, with a twist!

We had our normal activities, but also invited the <u>Illinois Chess Association</u>. This provided us with an interesting opportunity to share historical tales and meet our state counterparts.

At right, the head table shows the mix – members of the UOP team (including Art's daughter) and friends from the ICA.

The gentleman in the white shirt at right was the winner of the ICA Player of the Year.

Everyone seemed in top spirits, as showed when the trophies were awarded

Bijal Joshi (Motorola Kings) won Most Improved Player

Outgoing Treasurer **Lenny Spiegel** (Fermilab) is heavily thanked for his years of service

Tom Friske (Walgreens) was shocked by the League's decision to award him the Ron Dargis Award. This special recognition is for "outstanding service for the CICL", usually given to an out-going officer.

A top-quality *Chronos* brand chess clock was presented.

Tom is pictured trying to collect his thoughts and explain the joy of spending half-a-life on the CICL.

The evening finished in traditional style with a demonstration from **IM Angelo Young**. His first example was an tight battle with no obvious errors, until he found a trick in a even Pawn ending to break through. A very instructive finish!

What would be an evening without chess? **Tony Jasaitis** and **Art Olsen** got out the PC and paired attenders into three sections (by rating) and the day was finished on speed chess.

THANKS TO ALL! Who planned and attended. Banquet Chairman Burt Gazmen did another excellent job!

Walker,A - Friske,T 2006

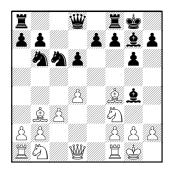

[B04]

[Notes by Arnie Walker, analysis by Fritz]

1.e4 Nf6 2.e5 Nd5 3.d4 d6 4.Nf3 g6 5.Bc4 Nb6 6.Bb3 Bg7 7.0-0 0-0

8.c3 Nc6 9.Bf4 Bg4 10.exd6 cxd6

Taking with the e-pawn would have been quite drawish, I believe. Black will concentrate against c4 and the b-c-d pawn chain. The knights will support and occupy c4. If White plays b3 to counter this, c3 can become a fatal weakness. However, White has more space and controls more of the board (including where the kings reside). If White solves the Q-side problem, he is likely to attain the overall advantage.

An example recapture with e-Pawn: 10...exd6 11.Nbd2 Qd7 12.h3

12...Bf5

12...Be6 13.Bxe6 fxe6 14.Bh2

Eaman,R (1839) – Benesa,A (2097) 4-4-2006

[D85]

[Notes by Robert Eaman]

My record to this point against Benesa was 0–4, so I wanted to play a solid game and hope for the best.

1.d4 Nf6 2.c4 g6 3.Nc3 d5

4.cxd5

4.Bg5 was something I'd tried before against Benesa, a year or two ago,

and I didn't like it then. 4...Ne4 5.Nxe4 dxe4 6.e3

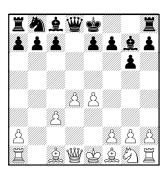

6...h6 7.Bh4 g5 8.Bg3 Bg7

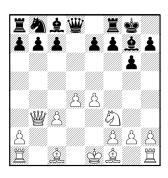

9.Ne2 c5 10.Qd2

4...Nxd5 5.e4 Nxc3 6.bxc3 Bg7

As soon as I saw this position, I realized black was going to play c5 at some point, so I prepared immediately.

7.Nf3 0–0 [7...Bg4 Might have been better.] **8.Qb3!?**

It was either this or Be2, and I thought I might be able to retard black's queenside development a bit while protecting the c3 pawn against a c5 push. [8.Be2 c5=]

8...c5!? I was surprised he played this, based upon the fact that my queen has c3 protected, but I didn't realize he's got Qa5 at his disposal later.

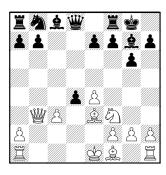

9.Be3

9.dxc5 Qa5

10.Bd2 Qxc5

9...cxd4

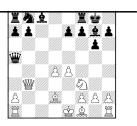

10.Nxd4!?

I debated long and hard on this move, and despite the fact that it leaves me with an isolated c-pawn, the knight retards the development of black's light-squared bishop and knight for a short while, which seemed better.

One try might be: 10.Bxd4 Nc6

Or how about 10.cxd4 Qa5+ 11.Bd2

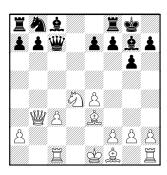

11...Qb6 12.Qxb6 axb6 13.Bc4 Rd8 14.Bc3

is unclear

10...Qc7 Helping black to develop his knight, and opening the d-file for the rook. **11.Rc1**

13.Be3 Be6 14.Qb2

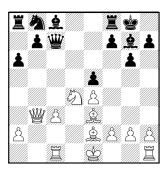

12.Be2

12.Bc4

I looked at this, but didn't like black's b5, nor how it tied down my queen.

12...e5?!

Blocking in black's dark-squared bishop, which I liked, positionally.

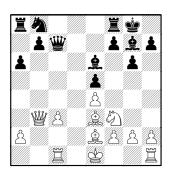

13.Nf3

13.Nc2 Nc6 14.Nb4

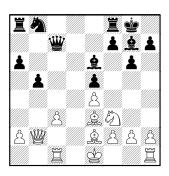

with the idea of Nd5.

13...Be6

14.Qb2 [14.c4? b5! 15.Qc2 Rc8] **14...b5**

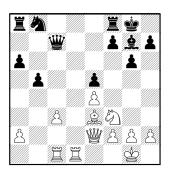

Making the c3 pawn an easier target. **15.0–0**

Relieved to finally castle, and noting that oddly enough, I seem to have positional equality and development advantages against someone who almost always has those against ME.

15...Bc4 with the desire to get the queen to c4, and keep the pressure on c3.

16.Rfd1 Bxe2 17.Qxe2

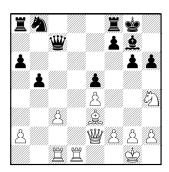

17...h6?! This seems like an unnecessary move that weakens black's kingside. This move comes back to haunt black later in the game.

17...Nc6 Allows me to play c4, but is probably better. 18.c4 b4

19.Rd5 Rfd8 White is slightly better

18.Nh4!?

The rule of thumb (especially against stronger players) is to NOT move one's knight to the a or h files. But this move creates possibilities for some nice kingside attacking (I vaguely saw Nxg6 with the white queen on the a2-g8 diagonal as a possibility), and the knight will end up at the powerful f5 square if black plays g5.

18...Qe7

18...Bf6?! 19.Bxh6

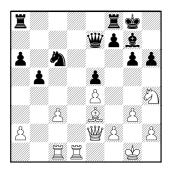

19...Bxh4 20.Bxf8 Kxf8 21.Qg4

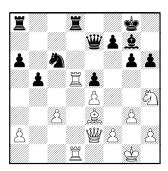

White is still slightly better

19.g3 Nc6

I immediately began to fear pushing c4, as black gets to play the positionally punishing Nb4 or Nd4. I also saw now how black could potentially get the knight to c4, so I had to mobilize quickly to avoid this fate.

20.Rd5 Rfd8 [20...Na5? 21.Bc5!] **21.Rcd1**

21...Qa3?! With the d-file to contest, I saw this as a slight positional mistake. The queen is almost always more powerful in the center. However, black's threats to white's 2 queenside pawns are to be taken seriously.

The question is: can white afford to give up those pawns for attacking chances? White now has many options here, and I spent a lot of time considering what I thought was the critical point in the game. I took stock of my positional advantages, and ultimately decided to play it conservatively for now, as black's counterplay is very limited.

A) Alternatively, 21...Bf6 22.Bxh6 Bxh4 23.gxh4 Qxh4

24.Bc1±;

B) But certainly not 21...Na5?! 22.a4!! Loses black both a and b pawns.

22.Qc2

A) I considered <u>22.Qg4?!</u> with the idea of Nxg6 and Qe6+, forking king and the knight on c6. Not quick enough, I decided.;

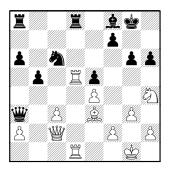

B) 22.Rxd8+!? Rxd8 23.Rxd8+ Nxd8

24.Qd2 Ne6= I did not see this continuation working as well for white, as it releases too much of the pressure on black.

C) Finally, there is 22.c4 b4 (22...bxc4 23.Qxc4±) 23.R1d3 Qa4± But this did not seem to be the right type of improvement for white, as I feared granting black the counterplay of a semi-passed b-pawn.

22...Bf8

Now we had approximately 20 minutes apiece to reach move 45. Time trouble began to weigh on my mind.

23.Nf3 Double-attacking e5 again, and offering white the chance to cover d4 against black's knight invasion on d4 if white pushes c4.

If <u>23.Bc1 Qa5</u>, again, it's not a clear improvement for white.

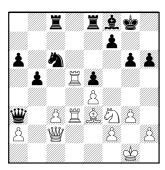

23...Re8?! As soon as I saw black give up the d-file, I knew I could now put more pressure on.

23...Bg7?! 24.Bc5! Qa5

24.R1d3 This was a move in time pressure that looks a little worse for black than it is. When I made this move, I knew would cost my opponent some valuable time to work the variations through.

24.Bc1?! Qe7 with no improvement for white.

24...Rac8

25.Qd2!

This nice move loads up on the d-file while threatening to take the weak h6 pawn, and threatening c4. My best move of the game to this point.

25.c4?!

The implied threat from white's 24th move. I didn't like Nb4 at all, though, and didn't want to open that can of worms in time trouble.

A) <u>25...Nb4 26.Rxa3 Nxc2 27.Rc3</u> Nxe3 28.fxe3

28...bxc4 29.Rxe5 Bg7 30.Rxe8+ Rxe8 31.Rxc4

B) <u>25.Bc1</u> doesn't seem to accomplish much, and I liked Qd2 better. 25...Qe7

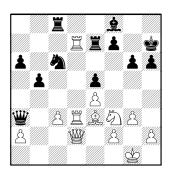

25...Kh7? Weakening f7, a mistake with the d-file under white's control.

<u>25...h5</u> Keeping the king at home seems much better.

26.Rd7!? I think this is premature, as I now can no longer play the freeing move c4.

Is <u>26.c4</u> better here? Tough to say. <u>26...Qa4 27.cxb5</u>

26...Re7

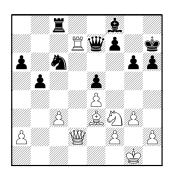

27.Rxe7

27.c4? Rxd7! 28.Rxd7 bxc4

27...Qxe7

27...Bxe7? 28.Bxh6! *or* 27...Nxe7? 28.Nxe5

28.Rd7!

28...Qe6

A) 28...Qe8 29.Qd5 Kg8

B) <u>28...Qf6</u> Threatens to take the knight on f3, and wins a valuable tempo. <u>29.Kg2</u>

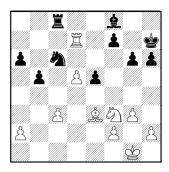

29.Qd5 Qxd5?? This is the critical mistake in the game. Black holds on much better with Kg8. We were both under some time trouble (less than 10 minutes left for 16 moves) at this point, though. [29...Kg8

is much better, as white now has no obvious continuations 30.Rb7!?

(30.Bxh6?! Bxh6 31.Rd6 Qxd5 32.exd5 Ne7-+)

30.exd5

30...e4?!

A) 30...Ne7?! 31.d6!;

B) 30...Nd8 seemed best to me at the time, but not pretty for black either way. 31.Nxe5 Kg8

31.dxc6!

31.Nd2 is also good, but not as good as dxc6.

31...exf3 32.c7!! This move works because black has no open file to threaten back-rank mate.

32.Rxf7+

Another good variation, but I liked the pressure of the pawn at c7 slightly better.

32...Kg8 33.Rxf3 Rxc6 34.Bd4

White is only up a pawn.

32...Bd6?!

A) 32...Kg8?? 33.Bxh6! Bxh6 34.Rd8+!!;

B) 32...Kg7

This move seems best, but it's fraught with peril.

33.Bd4+ Kg8 34.Bc5!!

34...Bxc5 35.Rd8+!!

33.Rxd6

33.Rxf7+

Nets white a 3 pawn advantage instead of the bishop. I liked the bishop better in this game.

33...Kg8 34.Rxf3 Rxc7 35.Rf6

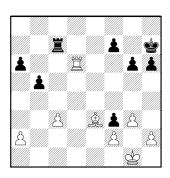

35...Bf8 36.Rxg6+ Kh7 37.Rxa6 Rxc3

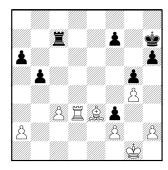

38.Rf6 Kg7 39.Rxh6

33...Rxc7

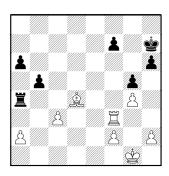

34.Rd3 g5 35.g4

35...Rc4

[35...h5 36.h3 f5 37.gxf5 g4 38.hxg4 hxg4 39.Rd4+-]

36.Bd4! Ra4 37.Rxf3

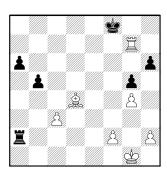

37...Rxa2 Again, under serious time pressure.

Is <u>37...Kg8?!</u> better for black? Doesn't seem so: 38.Rf6 Rxa2 39.Rxh6

with a huge mate threat at h8.

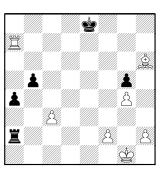

38.Rxf7+ Kg8 39.Rg7+ Kf8

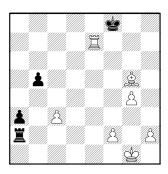

40.Ra7?!

40. Rb7 might have been better here, but under time pressure, I thought to block up the a-file instead. Either move threatens Bg7+, however.

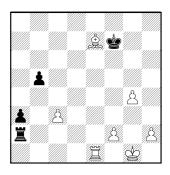

40...a5?! 41.Bg7+! Ke8 42.Bxh6 a4

43.Bxg5 a3 44.Re7+ Trying to make time control. h4 and Be7 are other solid possibilities here. **44...Kf8**

45.Re1! Cutting off black's Ra1+. **45...Kf7 46.Be7!**

Now ready to sacrifice the bishop for the a3 pawn if necessary, but black has no counterplay anyway at this point.

Overall, one of the most solidly played games of my chess career.

Your roving reporter was... well... roving, so missed the excitement on Playoff Saturday. Several cubs filed stories, so we do have a few bits to present... with games!

One note came in about the firstboard battles. That opinion was that Pete Stein had the most interesting and enterprising games. One doesn't become a Master without a sense for tactics, and he had fertile positions.

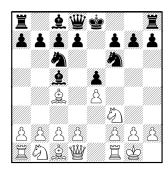

His first game was a quickie:

Stein,P (2206) – Melnikov,I (2048)

37.Kxa3 Qa5+

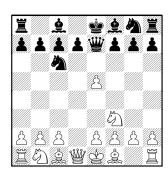

Black mates next with Qa1# 0-1

In round 3, Pete uncorked a real shocker for an opening against the Aces' Florentino Inumberable - the Englund Gambit (1.d4, e5) to get away from any preparation for a King's Indian, and to get into an open game. Pete got what he wanted, but not a win as Florin squeezed it out in an endgame.

The League Championship hinged on one last game, the game that wouldn't end, as most of us viewed it.

going on an hour after all others. Even one of the TDs had to leave.

The Baker team just about had the title in the bag, leading 3-2, with Shekhar Karandikar struggling to make something out a drawish ending vs. Wally Alberts on board 6. Shekhar had a Rook vs Knight, but Wally was up several pawns including a solid passed one.

The dozen or so people milling around all pretty much thought nothing could be made of this position. As it dragged on and on everbody was thinking, "come on already". But Shekhar kept pressing in true team spirit fashion, Very little progress was being made and the Motorola Knight player was using all of his time in both time controls to try and win the game.

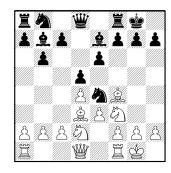

After about an hour got to the point where maybe there were some possibilities after all. He took a chance on freeing up Wally's strong passer to try to make some progress, but it wasn't good enough, and he had to give up his rook for the pawn and the knight for a draw.

A great example of team play!

Black should be aware that he's running out of Pawns. This means a win can only come from overwhelming piece play. His move is obviously with trades in mind... which heads for a balance that is at best a draw for Black. Not what he wants.

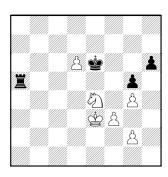

41.Rb2 Bxb1 42.Rxb1 Rxb3 43.Rxb3 Rxb3

Black cannot win from this position. He should never have steered into it. Maybe the other games weren't finished, so he didn't know.

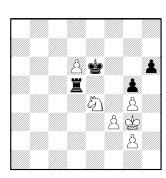

I always advise my players to keep a win in sight; never trade into a draw (from a promising position) before the match scenario is clear.

Somewhere around here, the other games were all decided, favoring St Charles Baker 3-2. So Black needs a win to save the match.

And the Baker club became CICL Champions .

MEANWHILE...

For the non-playoff teams, a "2nd-tier" event was also held at the Computer Associates' site. To encourage participation, the team size for this tournament was reduce to 4-people.

Seven teams entered so three rounds were planned. (For full results, see last month's May 2006 bulletin).

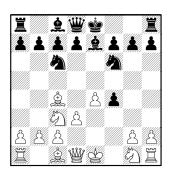

The final round found UOP (Gee Leong, Richard Easton, Frank Micklich and Art Olsen) at 2-0 paired against the 1-1 Pawns (K. Jakstas, Wayne Ellice, R. Fabijonas and Bob Mikulecky). This proved that UOP needed only a draw to clinch first place.

The top two boards were a bit onesided, featuring game-killing blunders. So the other two games were the keys to the result.

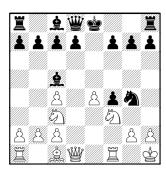

First, Art Olsen defeated Bob Mikulecky and then Frank Micklich defeated R. Fabijonas to clinch 1st place for UOP in the 4-man team tournament.

Congratulations to **Tony Jasaitis** for doing an excellent job of running the 2005-2006 playoffs as the CICL playoff Tournament Director.

Congratulations to **Matt Vail** and Computer Associates for hosting the 2005-2006 CICL playoffs. CA was a very good host for this season's playoffs.

Although Tony replied "My pleasure. It's also to everybody else's credit for their parts in a well-behaved machine.

I no longer am able to put in the time to play well, so hopefully I can at least put in enough time to enable others to do so."

Fred Furtner (AMA Tornado Snakes) succinctly replied for the whole League: "What do you mean you're no longer able to put in the time to play well? You're doing a great job as CICL President! In fact, I was thinking of placing your name on the ballot this November to become an Illinois congressman as well. You can handle it -- Tony. You're organized, AND fun.

And it's about time the citizens of this state find out about just how much we

enjoy your tenure as leader of the CICL.

Thanks for a great season!
