Still Looking for the Best...

First, let me state that the situation with FIDE is in such a state of chaos that it is hard to decide what should and should not be printed. The realtiy of the situation will no doubt only be known when all the smoke clears. The following are some of the many facts/rumours that are being circulated.

Campomanes Ousted as FIDE President.

On Sunday 19th of November at a FIDE Central Committee meeting in Paris, A motion of no confidence in FIDE President Florencio Campomanes and his whole team was passed 14 votes to 12. The motion was proposed by Phil Haley of Canada and backed by Fanueil Adams of the United States and Egon Ditt of Germany.

Although the vote seemed close, Campomanes and the other five members of his team all had votes and of course backed themselves.

The case against Campomanes was backed up with evidence from a Filipino Government investigation of the Manila Olympiad. It appears that Campomanes signed checks for various Olympiad expenses against undenominated funds. (this evidence was presented by Norwegian lawyer Norwegian lawyer Morten Sand). Also Kurt Jungwirth presented a "devastating" (according to one

observer) report about election irregularities during the 1994 Moscow Olympiad. In one particularly glaring case Campomanes used the Philippine vote himself and voted the Brunei proxy (which was given to the Philippine delegate not Campomanes) he was not entitled to do either of these things. This, of course was enough for him to get through the crucial vote allowing him to stand.

An immediate attempt to declare the decision illegal was made by Filipino Casto Abundo. This lead to a walkout from the meeting by the US and some other countries. After an hour the meeting reconvened and the decision stood.

The decision could now only be reversed by the FIDE General Assembly which took place the following day.

FIDE GENERAL ASSEMBLY

Campomanes chaired the assembly but indicated his intension to resign at the end of the General Assembly.

On day two there was further FIDE News. It appears that FIDE only has 150,000 Swiss francs in its coffers (about \$135,000). Furthermore last June as part of a pensions deal Campomanes was paid nearly 200,000 Swiss francs and G. Makropoulos 30,000. The calcuations that produced this payout mean that rough calculations mean that Campomanes was paid over \$100,000 a year. This does not include

the expenses which according to some sources even exceeded this payment.

63 Nations are said to have threatened to withdraw from FIDE unless full democracy was returned. Vice President Ghobash stated that he believed that he should be next in line if Campomanes did carry out his threat to resign. It was dismissed by the supporters of Kouatly who now appear to have near control of FIDE.

The FIDE General Assembly upheld the recommendation of the Central Committee to reject the PCA-FIDE agreement as it stands.

The Central Committee recommendation is as follows:

Following the Moscow
Congress, good will and a lot of
effort by FIDE's officers have
been put into trying to achieve
agreement with the PCA.

It is regretted that the current state of negotiations, represented by the draft set of regulations sent to FIDE by the PCA on 19.11.95 is unsatisfactory.

Beside some general points, which might be resolved, there are two principal difficulties:

- 1) The proposed match regulations are not equal for both players and therefore unacceptable;
- 2) FIDE would be renouncing sovereignty over the World Championship.

4

Therefore the Central Committee recommends that the General Assembly reject the agreement as it stands.

This recommendation was accepted by the FIDE assembly.

New Presidential Team

FIDE held elections in the early hours of November 24th. They elected the following team until the end of 1996. The assmembly vote was 95-3 and they set up the elections for late next year.

New FIDE President: Krisan Iljumzhinov

The Russian Chess Federation, in spite of Kasparov's known dealings with Iljumzhinov spoke against him. They however disappeared during the voting, presumably they need to know whose side they are on. Andrei Makarov and Iljumzhinov are reported not to get on. A letter from President Yeltsin in support of Iljumzhinov seemed to settle the matter.

"The Karpov-Kamsky match has a sponsor in Montreal and apparently will take place in

The Chicago Chess Player

1996. FIDE formed a Unity Commission with the following members: Ralf Liniger (Swiss), John Warlick (U.S. Virgin Islands), S. Garcia (Cuba), Omuku (Nigeria), Israel Gelfer (Israel), Giorgios Makropoulos (Greece), Morten Sand (Norway) and E. Steven Doyle (USA). The purpose of this commission is to arrange a unification match in 1996 between the winner of Karpov-Kamsky and Kasparov." [Larry Parr]

The state of the s

FIDE President Meets with Bobby Fischer

On Friday, December 15th, the President spent a night in Budapest meeting Robert J Fischer: he promised to pay to Fischer the \$100,000 claimed as due from the former USSR Chess Federation. After twelve hours of talks, Bobby promised to reconsider his position with FIDE and accepted from the President a gift of land to build a house in Kalmykia. However Fischer insisted that his chess rules should be adopted by FIDE. The President also had some conversations with Kasparov. Nothing concrete was decided, but more meetings are to come.

FIDE RATING LIST JAN 1996

Points to note. Kasparov appears second on the rating list to Vladimir Kramnik. Kramnik had more rated games and thus appears first. Rating differences of less than 25 points are negligible statistically so we see a group of Kramnik, Kasparov and Karpov as clear leaders in the World, Ivanchuk. Anand and Kamsky form a second close group. These are the clear chess elite. The Kasparov-Anand PCA match was not rated because the results were not submitted. Kasparov's performance rating for that match would have been 2782 for 18 games, Anand's 2738. It is not clear to whether this would have increased or decreased his rating as compared to this list.

Judit Polgar is the first woman ever in the top 10 in the World. She had a solid year consolidating gains from previous years. She won a number of matches convincingly and is reported to be very happy with her progress in positional chess.

Groningen and the proposed World-Championship tournament.

'FIDE is there to promote chess and should be above all other chess organisation'. With these words the President clearly replies to the PCA concerning the World Championship matches. He wants G.Kasparov to return to the FIDE's cycle for the sake of unity and as best for chess.The President proposes to create, starting at the end of 1996, an annual 21 days Knockout Championship tournament. Two to four games to decide each pairing. Some players will qualify directly into round two and some to round three. (The schedule and list of players is already fixed) Kasparov and the winner of Kamsky -Karpov will go directly to the semi finals though they will be paired together only if they reach the final. For the first event the prize fund will amount US\$ 5,000,000!! This new idea accepted unanimously by the P.B, will have the direct effect that the Interzonal scheduled for Yerevan, Armenia in April-May 1996 is cancelled.

It may be obvious that the proposal for the WC 1996 by the new FIDE president initially came as an unpleasant surprise to the organization in Groningen. The dates of WC 1996 and Groningen overlap and when all strong players take part in the WC, it is practically impossible to organise a tournament in Groningen. Sponsorship for Groningen 1996 has already been assured and nobody wants to stop a tradition that started 34 years ago.

The shortest statement that can be made is: "If WC 1996 is in

December it will be in Groningen." The organisation in Groningen is thus prepared to organise the WC 1996, just as they organised the PCA candidates tournament in 1993.

The likelihood that the proposal by the new FIDE president is accepted by the top players is very close to 0%. Most of the players who voiced their opinion were very negative about the idea. The expectation is that Kasparov will not agree to it either. Given that the proposal gives the impression that the main purpose is to re-unite FIDE players and PCA players and that the top players in both camps will not accept the formula, it must be concluded that the proposal is just an attempt to get all parties around the table. They at least agree on something now: the FIDE proposal is not acceptable.

An alternative formula, that has been suggested in Groningen is to create a "compact World-Championship" as follows:

- 1) A Swiss open with 64 players (say 11 rounds).
- Immediately followed by a round-robin tournament with the top 8 of the Swiss.

The final outcome of what will happen is still totally up in the air.

Interview with Gata Kamsky. (From Groningen)

Q. Are you happy with your performance in this tournament?

Yes, it is nice to play again.
That's why I participated.
Playing is different from analysing at home, you cannot take back the moves. I missed

some good chances, because of lack of play. For example, in my game with Karpov I had a good position from the opening and then I could not find a plan and gave the position away. I'm very happy I was invited to play here.

Q. What is going on with the WC match?

I don't know any details, no official papers. All the negotiations are with Karpov and I can only wait. The date for the WC match is changing all the time, first it was November, then December, February and now June perhaps, but then there are the Olympics...

Perhaps it will happen that in January (the final deadline) the Montreal organisation will say they have not found the money and Karpov continues to be the WC, and there is nothing I can do about it.

We (Rustam and Gata) have found many sponsors for the match. At least four Russian cities offered a prizefund that is significantly higher than the standard FIDE-fund. We think that Karpov has broken off the negotiations.

Q. Do you want to become WC?

You think I would answer no! As a WC you can earn a lot of money, status, prestige and you get good invitations. Of course, every chess player wants to become WC and so do I.

It is clear that neither Kasparov nor Karpov would like me to become WC. They both enjoy the power that being a WC provides. Especially Kasparov is blocking my way.

Q. What do you think of the new WC-cycle proposal?

My main problem is that the time between my WC-match with Karpov and the new WC-cycle is very short. Then I will be WC for only a few months and I don't like that. Otherwise, I'm not really against the proposal.

Q. How do you study chess?

That is a secret.

Q. What database do you use?

ChessBase.

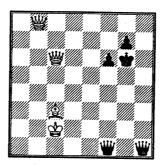

BEATING KASPAROV

While digging through my database I came across something very interesting. Of the games I could find where each side had two queens, there were two losses by Gary Kasparov and now wins or draws. Maybe all it takes to beat Gary is to get additional queens(!).

A YEAR AT THE TOP

BY MARK SIWEK KEMPER - NORTH DIVISION

(Editor's Note: This article arrived in my mailbox over the holidays and was a real gift indeed! I hope Mark has set a new precident and other top players in the CICL will contribute also.)

The Editor put out a call for articles to make our bulletin better, so I thought I'd try answering him. Some readers have kindly complimented me on my past published annotated games, so I figured there might be some interest in looking at my 1992-1993 season, when I went undefeated on Board 1. I scored 5 wins, 0 losses, 4 draws in the regular season on my way to being named North Division MVP. I think some of the games are instructive, and a few of them even illustrate the value of luck!

GAME 1:

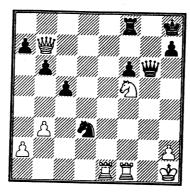

HASAN - SIWEK MOTOROLA vs KEMPER

My season opened with a lifeless, almost boring draw. In a brief post-mortem, Hasan and I agreed that I had the advantage out of the opening, but frittered it away in the middlegame.

1.Nf3 d5 2.b3 c5 3.Bb2 Nc6 4.e3 Bg4 5.Be2 e6 6.O-O Nf6 7.h3 Bxf3 8.Bxf3 Be7 9.d4 cxd4 10.exd4 O-O 11.Nbd2 Qb6 12.c3 Rfd8 13.Re1 14.Qe2 h6 15.Nf1 Qa5 16.Qd3 b5 17.Ne3 Qb6 18.b4 a5 19.a3 a4 20.Ng4 Nxg4 21.Bxg4 Bf6 22.Re2 Ne7 23.Rae1 Rc6 24.Bc1 Qc7 1/2-1/2

GAME 2:

REYES - SIWEK SEARS vs KEMPER

White to move after 29... Nb4-d3.

I had played an absolutely horrible game, but rather than resign, I played 29... Nb4-d3 with the idea of ... Ne5 closing the e-file. I'm dead lost, nut I thought I'd play on in the extremely remote chance I might be able to swindle Ruben into a perpetual. However, he gave me something better. He played

30.Rg1??,

which looks like a killer move, except for one problem: my reply was

30...

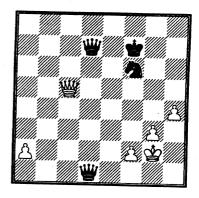

Nf2! Matel

Ruben stared at the board for a minute, then burst out laughing. One of his teammates later told me this was the first CICL game Ruben had lost in three or four years.

GAME 3:

WEITZ - SIWEK FEL-PRO vs KEMPER

Again, not a particularly wellplayed game, but I won a pawn in the opening, survived a kingside knight sacrifice, and wound up with two queens in the endgame.

Black to move.

I simplified with

43... 44.Qxd5 45.Kh3 Q1d5+ Qxd5

Missing 45... Qh1! mate and letting Ron play another 15 moves after

45...

Qf5+??.

(Even better is 43... Qh3+! followed by Qh1 mate. -Ed.)

GAME 4:

SIWEK - WEBER KEMPER vs FRANKLINWATTS

This was an interesting contest. However, from a complex, wxciting middlegame, it petered out into a very equal endgame.

1.e4 Nf6 2.e5 Nd5 3.d4 d6 4.c4 Nb6 5.f4

The Four Pawns Attack, one of the sharpest lines against the Alekhine.

5... dxe5 6.fxe5 Bf5 7.Nc3 e6 8.Nf3 Nc6 9.Be3 Be7

An interesting deviation is 9...
Nb4 10.Rc1 c5 11.Nc3 Be7
12.O-O cxd4 13.Nxd4 Bg6
14.a3 Nc6 15.Nxc6 as in Siwek-Lee, Kemper vs. Western
Electric, 1982-83 CICL playoffs.

10.Be2

I've also experimented with 10.d5.

10... O-O 11.O-O f6 12.Qe1

The main line is 12.exf6 Bxf6 13.Qd2 Qe7 14.Rad1 Rad8 when 15.Qc1 and Qe1 are the major alternatives. I also considered 12.Nh4.

12... Nb4

12... fxe5 13.dxe5 Nd7 14.Rd1 Qe8 is equal, according to MCO-13.

13.Rd1 Nc2 14.Qf2 Nxe3 15.Qxe3 Qe8

ECO-2 gives 15... c6 as unclear.

16.d5

Thematic. I presume ECO-2 recommends 15... c6 to prevent the text.

16... fxe5 17.dxe6 Bxe6 18.Nxe5 Rxf1+ 19.Bxf1 Qf8 20.Kh1 Bc5 21.Qe4 Qf5

Unexpected. I now thought for a long time, considering 22.Bd3, 22.Qe1, Qxf5 (which my opponent thought I'd play), 22.g4, and 22.b3.

22.Bd3 Qxe4 23.Bxe4 c6 24.b3

I offered the draw with my 24th move.

GAME 5:

SIWEK - STEVANOVIC, KEMPER vs UOP

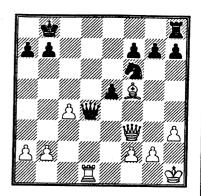

I won the first of my Best Annotated Game prizes for this win. See the January 1993 bulletin for the full annotations.

1.e4 d6 2.d4 Nf6 3.Nc3 g6 4.f4 Bq7 5.Nf3 O-O 6.Bd3 Na6 7.e5 Nd7 8.Ne2 c5 9.c3 cxd4 10.cxd4 Nb4 11.Bb1 dxe5 12.fxe5 Qb6 13.Nf4 Rd8 14.Qb3 Nf8 15.Be3 Nc6 16.Qc3 Qa5 17.Be4 f6 18.O-O Qxc3 19.bxc3 fxe5 20.Bd5+ e6 21.Bxc6 bxc6 22.Nxe5 Bxe5 23.dxe5 g5 31.Bh6 Kg8 32.Rd4 Bxa2 33.Nd3 Rb1+ 34.Kh2 Nh7 35.Rq6+ Kh8 36.Bg7+ Kg8 37.Bh6+ Kg8 38.Nf4 Rb2 39.Nxe6 Bxe6 40.Rxe6 Rb7 41.Rxc6 a5 42.Rcd6 Rbb8 43.e6 a4 44.e7 Nf6 45.Rd8+ Kh7 46.Rxb8 Rxb8 47.Bq5 1-0

GAME 6:

BLOOM - SIWEK EXEMPLARS vs KEMPER

I didn't play the opening well, and Bloom gave up a pawn for an attack. I managed to defend well enough, and then he had to fight for the half point.

Black to move.

21... Qxc4 22.Qa3 Qc7 23.b4 Rd8 24.Rc1 Qd6 25.Qc3 a6 26.a4 g6 27.Bg4 h5 28.Be2 Nd5 29.Qc4 Nf4 30.Bf3 f5 31.Rd1 Qe7 32.b5 Rxd1+ 33.Bxd1 Qd8 34.Bb3 axb5 35.axb5 Qb6 36.Kg1 e4 37.Bc2 Qa5

I considered 37... Qc7 so if 38.Qb3 Ne2+ followed by ... Nd4, but after 38.Qxc7+ Kxc7 I didn't like the minor piece ending - - Black's kingside pawns are on the wrong color squares, and even if that weren't a consideration, if the ending was reduced to N + P vs. B, white could "sac" the cleric.

38.Kh2 Qd8 39.g3 Nd3 40.Bxd6 exd6

I saw the passed pawn and was concerned about 40... Qxd6 41.Qg8+ Ka7 42.Qxg6 but that was probably my best winning chance - - with 42... Qf3 -- though probably insufficient.

41.Qf4+ Qc7

I didn't see white's next, which initiates a perpetual, but 41...

Ka8 42.Qa4+ Kb8 43.Qf4+ repeats moves.

42.Qd4 b6 1/2-1/2.

GAME 7:

SIWEK - JAKSTAS KEMPER vs NORTHROP

This exciting contest is worth studying.

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 e5 5.Nb5 d6 6.N1c3

In Beating the Sicilian, GM John Nunn quotes a game 6.c4 Be7 7.N1c3 a6 8.Na3 Nf6 9.Be2 O-O 10.Be3 Be6 11.O-O Rc8 12.Rc1 as good for white.

6... a6 7.Na3 Nf6

ECO-2 gives 7... Be6 8.Nc4 Rc8 9.Nd5 Bxd5 10.exd5 Nb8 11.Be2 Nd7 12.O-O Ngf6 13.a4 Be7 ± as its main line.

8.Bg5 Be7

Nunn calls this "definitely inferior," adding "Black commits the bishop too soon." His main line is 9.Nc4 Be6 10.Bxf6 gxf6 11.Ne3 Qd7 12.Ncd5 followed by Bd3 and Qh5 "with a total white-squared bind."

9.Bxf6

Another ECO-2 line is 9.Nc4 Nd4 10.Bxf6 Bxf6 11.Nd5 Be6 12.Ncb6 Bxd5 13.Nxd5 Bg5 14.c3 Ne6 15.g3 ±)

9... gxf6

This is a book capture in some lines, but with 8... b5 -- instead of 8... Be7 -- played. However, I don't think it's appropriate here. Black's KB gets too bottled-up.

10.Bc4

The Chicago Chess Player

On 10... b5, I intended 11.Bd5, and on 10... Be6 11.Qh5, so after 11... Bxc4 12.Nxc4 b5 13.Ne3 clamping down on d5. The text also prevents ... f5 because of 11.Qh5.

10... 0-0

If black can get in ... f5, ... Bxf5, and if necessary, ... Bg6, his king should be perfectly safe. He also may have king-side attacking chances after ... Kh8 and ... Rg8. My next move is designed to prevent ... f5, but it does suggest a king-side attack. After the game Jakstas told me 11.Qh5 was strong.

11.Qh5 b5 12.Bd5 Bd7

I had expected 12... Bb7, but black wants to keep an eye on the c8-h3 diagonal with hopes of an eventual ... f5. He never succeeds. As a result, the KB remains buried.

13.Ne2

Defensively, responding to the threat of ... b4, positionally preventing ... Nd4 -- Nxd4 would give black two sets of doubled isolated pawns -- and offensively preparing for Ng3-f5.)

13... Rc8 14.c3 b4 15.Nc2 bxc3 16.Nxc3 Nd4 17.Ne3 Qb6 18.Bb3

18.Rb1 fails to 18... Rxc3, and if 18.O-O Qxb2 and my knight has nowhere to run. Hmm... if d5 were unoccupied, that would be a great square, forking black's queen and bishop. And who cares about the pawn black could pick up after ... Nxb3, axb3, ... Qxb3 ?There are plenty of weak black pawns to pick up, and besides, I'm after his KING!

18... Be6 19.O-O Bd8

I was surprised by this. I thought he would chop the bishop. I now eliminate that possibility and bring the knights into play.

20.Ncd5 Qb7 21.Ng4 Bxd5

I thought for sure that he would take the other knight. However, I can't criticize too much; Kaz defended well.

22.Bxd5 Qd7 23.Nh6+ Kg7 24.Rae1

I also considered f4, but I didn't like the 24... Ne2+ resource. The QR will enter the game through a "rook lift," I was okay timewise, but Jakstas was beginning to get into a little time trouble.

24... Rc7 25.Re3 Qb5 26.Nf5+

As noted previously, Jakstas defends well. If the Re3 moves to another file -- e.g. Rg3-- ... Qxf1+ followed by ... Rc1+ mates! My motto with the text was better safe than sorry. Unfortunately, black's king will now be able to march towards the Q-side. I'm always one attacking tempo short.

26... Nxf5 27.Qxf5 Qd7 28.Qh5 Rh8 29.Rg3+ Kf8 30.Qh6+ Ke8

30... Ke7 31.Qg7 or 31.Rg7. Note that due to the uncoordinated position of his pieces, black could still get mated in the center on f7.

31.Qg7 Rf8 32.Qxh7 Rc2 33.Rg8 Qe7?

A time pressure blunder.
Jakstas had about 10 minutes left to reach the time control at move 50. As he pointed out after the game, 33... Bb6 would have offered good drawing chances.

34.Bb3

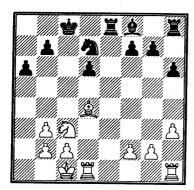

Played instantly. If the rook moves, Ba4+ spells finis.

1-0

GAME 8:

SIWEK - WEITZ KEMPER vs FEL-PRO

I had built an opening advantage, when black opened the floodgates...

Black to move.

20... Nf6?

Black destroys his pawn structure, allowing white an easily won endgame. I had expected 20... Rg8 followed by ... g6 or ... g5 to activate the bishop. I now win a pawn.

21.Bxf6 gxf6 22.Rhe1 Bg7 23.Rxe8+ Rxe8 24.Rxd6 h5 25.Kd1 Rd8?

Black should keep the rooks on the board. White's task is even easier now, thanks to the bad black bishop and the "holes" in his pawn structure.

26.Rxd8+ Kxd8 27.Ne4 h4 28.Nd6 Kc7 29.Nf5

Missing 29.Ne8+, but white still won easily.

29... Bf8 30.Nxh4 Kd7 31.Nf5 Ke6 32.g4 b5 33.h4 a5 34.h5 Ke5 35.h6 Bxh6 36.Nxh6 Kf4 37.Ke2 b4 38.f3 Kg5 39.Nxf7+ Kg6 40.Nd6 Kg5 41.Nc4 f5 42.gxf5 Kxf5 43.Nxa4 1-0

GAME 9:

JAKSTAS - SIWEK NORTHROP vs KEMPER

Again I played a bad opening, but managed to overcome it. I thought 10.Qh5 was strong, but apparently black had the resources to overcome it. After 14... e5, my Q-side pieces sprang to life, and everything was all right with the world. Jakstas' 22.Rxd3, sacrificing the exchange, was the best practical chance.

1.d4 d5 2.Nf3 Nf6 3.Bg5 e6 4.Nbd2 Be7 5.e3 O-O 6.Ne5 c5 7.c3 Nc6 8.f4 Nd7 9.Bxe7 Qxe7 10.Qh5 g6 11.Qh6 Ndxe5 12.fxe5 f6 13.exf6 Rxf6 14.Nf3 e5 15.O-O-O Bg4 16.Be2 cxd4 17.cxd4 e4 18.Ng1 Bxe2 19.Nxe2 Nb4 20.Kb1 Nd3 21.Qg5 Qf7 22.Rxd3 exd3 23.Nf4 Rf5 24.Qg3 Rc8 25.Qe1 Qc7 26.Qd2 Qc2+ 27.Qxc2 dxc2+ 28.Kc1 g5 29.Nd3 a5 30.Re1 b6 31.a3 Rf6 32.h3 h5 33.Kd2 c1(Q)+ 34.Nxc1 Rf2+ 35.Re2 Rxe2+ 36.Nxe2 Rf8 ½-½

It was late, the match was over (Kemper won), and though I had a slight material advantage, it would most likely take hours to convert... if it could be converted at all. I thus offered a draw, preserving my perfect regular season record.

P.S. On a technicality, Kemper made the secondtier playoff's (then only for third and fourth place teams), but the magic didn't continue. I blundered away my first game with a dominating position against a 1700-rated player (I was 2237), played probably my worst CICL game ever to drop the second contest, and barely held my opponent to a draw in the third round. Who says life isn't funny?

ATTENTION! The CICL Playoffs are closer than you think and a Tournament Director is needed. If you can volunteer your services, please contact League President Satish Kale ASAP. Remember, the CICL lives on the contributions of its members.

ON THE LIGHTER SIDE

HOW TO TELL IF YOUR HEAD'S ABOUT TO BLOW UP

(From the WEEKLY WORLD NEWS, May 24, 1994)

MOSCOW — Doctors are blaming a rare electrical imbalance in the brain for the bizarre death of a chess player whose head literally exploded in the middle of a championship game! No one else was hurt in the fatal explosion but four players and three officials at the Moscow Candidate Masters' Chess Championships were sprayed with blood and brain matter when Nikolai Titov's head suddenly blew apart. Experts say he suffered from a condition called Hyper-Cerebral Electrosis or HCE.

"He was deep in concentration with his eyes focused on the board," says Titov's opponent, Vladimir Dobrynin. "All of a sudden his hands flew to his temples and he screamed in pain. Everyone looked up from their games, startled by the noise. Then, as if someone had put a bomb in his cranium, his head popped like a firecracker."

Incredibly, Titiov's is not the first case in which a person's head has spontaneously exploded. Five people are known to have died of HCE in the last 25 years. The most recent death occurred just three years ago in 1991, when European psychic Barbara Nicole's skull burst. Miss Nicole's story was reported by newspapers worldwide, including WWN. "HCE is an extremely rare physical imbalance," said Dr. Anatoly Martinenko, famed neurologist and expert on the human brain who did the autopsy on the brilliant chess expert. "It is a condition in which the circuits of the brain become overloaded by the body's own electricity. The explosions happen during periods of intense mental activity when lots of current is surging through the brain. Victims are highly intelligent people with great powers of concentration. Both Miss Nicole and Mr. Titov were intense people who tended to keep those cerebral circuits overloaded. In a way it could be said they were literally too smart for their own good."

Although Dr. Martinenko says there are probably many undiagnosed cases, he hastens to add that very few people will die from HCE. "Most people who have it will never know. At this point, medical science still doesn't know much about HCE. And since fatalities are so rare it will probably be years before research money becomes available." In the meantime, the doctor urges people to take it easy and not think too hard for long periods of time. "Take frequent relaxation breaks when you're doing things that take lots of mental focus," he recommends.

Although HCE is very rare, it can kill. Dr. Martinenko says knowing you have the condition can greatly improve your odds of surviving it. A "yes" answer to any three of the following seven questions could mean that you have HCE:

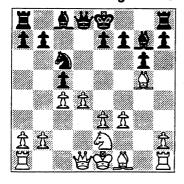

- 1. Does your head sometimes ache when you think too hard? (Head pain can indicate overloaded brain circuits.)
- 2. Do you ever hear a faint ringing or humming sound in your ears? (It could be the sound of electricity in the skull cavity.)
- 3. Do you sometimes find yourself unable to get a thought out of your head? (This is a possible sign of too much electrical activity in the cerebral cortex.)
- 4. Do you spend more than five hours a day reading, balancing your checkbook, or other thoughtful activity? (A common symptom of HCE is a tendency to over-use the brain.)
- 5. When you get angry or frustrated do you feel pressure in your temples? (Friends of people who died of HCE say the victims often complained of head pressure in times of strong emotion.)
- 6. Do you ever overeat on ice cream, doughnuts and other sweets? (A craving for sugar is typical of people with too much electrical pressure in the cranium.)
- 7. Do you tend to analyze yourself too much? (HCE sufferers are often introspective, "over-thinking" their lives.)

The Finishing Touch

by Ruben Reyes

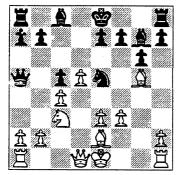

E. Buerger (2100) of UOP versus C. Dobrovolny (1925) of AT&T Dragons in the 1995 playoffs was quite a battle.

Let's look in after 9.gxf3 NC6

Black has come out well in the opening. Here he's got excellent pressure on the long diagonal a1-h8.

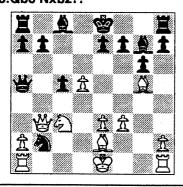

10.d5 Ne5 11.Nc3 Qa5 12.Be2

12....Nxc4!

An ingenious move. If 13.Bxc4 then 13...Bxc3+ 14.bxc3 Qxc3+ 15.Kf2 Qxc4 when black wins back his piece and a pawn to boot.

13.Qb3 Nxb2!?

Black wins another pawn via another ingenious knight capture as 14.Qxb2? Bxc3 loses the queen for white.

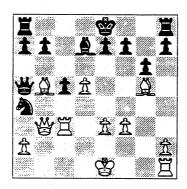

14.Rc1

Now black's knight is stranded.

14...Bxc3+

Seeking escape for the N to a4.

15.Rxc3 Na4 16.Bb5+ Bd7

17.Bxa4

The natural continuation 17.Bxd7+ (diagram below) wins as black

either gets mated or loses material. If 17... Kxd7 (Or 17... Kf8 18. Bxa4 a6 19. Bh6+ Kg8 20. 0-0 b5 21. Qb2 wins as

21...Q or bxa4 is mate in two: 22.Rc8+ followed by 23. Qg7++) then 18. Qx b7+.

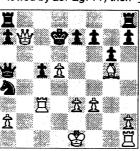

Diagram left leaves black with two choices:18... Kd8 or 18 ... Kd6, both of them bad. If <u>18...Kd6</u> it's mate in six: 19.Qxe7+ Kxd5 20. Qd7+ Ke5 21. f4+ Ke4 22.Qd3+ Kf3 23. e4+ Kg4 6.Qh3++

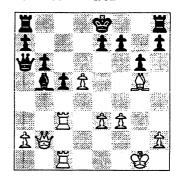

If 18...Kd8 (Not 18...Ke8??

19.Qxe7++) black gets mated or has to give up the Q to avoid mate: 19.

<u>Bxe7+ Ke8</u> 20. <u>Bf6</u> (threatening mate in one, 21.Qe7++) when one way to postpone getting mated is to give up

17...Bxa4 18.Qa3 b6 19.O-O Qa6 20.Rfc1 Bb5 21.Qb2

the Queen: 21...Qxc3+22.Bxc3.

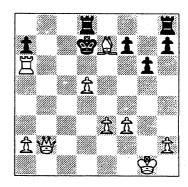

Threat: 22.Ra3 and 23.Qxh8.

21...0-0-0

Castling into the line of fire of two rooks is just asking for trouble.

- 21...0-0 was no better as 22.Bh6 threatens both 23.Bxf8 and 23.Ra3 winning the queen (else 24.Qg7++)
- 21...f6 isn't pretty but it could keep black alive a little bit longer.

22.Bxe7 Bd7 23.Rxc5+!! bxc5 24.Rxc5+ Bc6 25. Rxc6+ Kd7 26.Rxa6 0-1

Nice finishing touch.

OPENING THEORY

THE MODERN DEFENCE

By Nigel Davies

(Editor's Note: This article was written by GM Davies from Great Britain for release to the general public on the internet. In an effort to supply the best articles possible for TCCP and a desire to start including some opening theory material, the following material is presented. Other such articles will be presented as they are discovered.)

It was in the late 1970s that I first made the aquaintance of this provocative counter attacking defence.

Under the influence of Raymond Keene, a great many British players were playing it around that time and I decided to jump on the bandwagon. Later on it proved quite difficult to jump off again and play more classical openings, but then that's another story.

With his first two moves, 1...g6 and 2...Bg7 Black makes no attempt whatsoever to follow the tried and trusted classical precept of occupying the center. Instead he calmly fianchettoes a bishop and argues the he can attend to things like development later in the game.

Some practitioners of the Modem (Colin McNab and David Norwood for example) like to try and close the position up with ... c6 and possible ... d5. But I have my own interpretation involving a fierce counterattack against the d4 square.

Above all I want that bishop on g7 to breathe fire, to strike terror along the h8-a1 diagonal. Sometimes I play ... c7-c5, sometimes ... e7-e5, but always something against the d4 square and with that long diagonal in mind.

There isn't enough time to show all the ins and outs of this defence, but the following games show my interpretation in action against a variety of White set-ups and how this opening has served me faithfully in some critical games. Amongst my victims with this opening are the likes of Bent Larsen and Viswanathan Anand, but on this occasion I'll show you the real crushes!

The first game was played in the last round of the student team Championships in Graz 1981 in which the England team was going for the silver medal....

Polajzer-Davies Student Team Ch., Graz Austria, 1981

1.d4 g6 2.c4 Bg7 3.Nc3 d6 4.e4

According to the late Mikhail Botvinnik, setting up the pawns on d4, c4 and e4 is the strongest answer to the Modern Defence. I have usually preferred my 'stock' recipe; a counterattack against the d4 square.

4... Nc6! 5.Be3 e5! 6.d5 Nce7

Reaching a kind of King's Indian Defence in which the fact that Black's knight has not been developed on f6 yet means that he can sometimes play ... f7-f5 before bringing it out. White takes immediate measures against this.

7.g4 c5 8.h4 Nf6 9.g5 Nh5 10.Be2 Nf4 11.Bf3 0-0 12.Nge2 f5 13.Qd2 Qa5 14.0-0-0 Rb8!!

One of the best moves I have ever played. The idea, should White play quietly now, is to prise open the queenside with b5 followed by a6. And there are other points should White capture on f4.

15.Nxf4 exf4 16.Bxf4 fxe4 17.Bxd6

The line which most beautifully illustrates the power of 14...
Rb8 is 17.Bxe4 Bxc3 18.bxc3
Rxf4 19.Qxf4 Qxc3+ 20.Kb1 (or 20.Bc2 Bf5 21.Rd2 Qa1+) and now 20... b5, opening up the b-file. White, by the way, loses a piece after 17.Nxe4 Qxd2+.

17... Rxf3! 18.Bxb8 Rxc3+! 19.Kb1

Or 19.bxc3 Bxc3 20.Qc2 Qa3+ 21.Kb1 Bf5 followed by 22... e3.

19... e3 20.fxe3 Bf5+ 21.Ka1 Rc2! 0-1

White lost on time by he could equally have resigned. 22.Qxa5 is met by 22... Bxb2+ 23.Kb1 Rd2+ followed by mate. I still count this as my most artistic miniature.

This next game was one of the wins which earned my first Grandmaster norm in Oslo 1988. After a few careless moves in the opening Black develops a murderous attack. White, by the way, is not a patzer. These days he has a rating of around 2500 and is on the verge of becoming a GM.

Gausel,E - Davies,N Oslo, 1988

1.d4 d6 2.e4 g6 3.Nc3 Bg7 4.Bc4 Nc6 5.Be3 Nf6 6.h3

Preventing 6... Ng4 but losing time for development.

6... e5 7.dxe5 Nxe5 8.Bb3 0-0 9.Qd2 b5!

White's neglect of development allows Black to take the initiative.

10.f3 b4 11.Nd5 Nxd5 12.Bxd5 c6 13.Bb3 a5 14.a4 d5

Blasting open the center before White has got his king safe. If he had now tried to remedy this with 15.0-0-0 there would follow 15... Qf6 and after 16.Bd4 there is 16... c5!, distracting the bishop from the defence of b2.

15.exd5 Nc4! 16.Bxc4 Bxb2!

Suddenly White is in desperate trouble; the threats include 17... Bxa1 and 17... Bc3, not to mention 17... Qh4+.

17.Ne2 Qh4+

Even stronger than capturing the rook on a1, as that will remain a threat.

18.Bf2 Qxc4 19.Rb1 Bc3 20.Nxc3 bxc3 21.Qd3 Re8+ 22.Kd1 Qa2! 23.Rc1 Ba6 24.Qxc3 Qxd5+ 25.Qd2 Rad8! 0-1

で表演動権。付きた。1995年2年3月1日 11日 日本 - 大学 - 大学家に対して

The final position shows the true extent of White's misery.

Engedal,N - Davies N Gausdal Peer-Gynt , 1990

1.e4 g6 2.d4 Bg7 3.Nc3 d6 4.f4 Nc6

I was later to abandon this move after Dragan Velimirovic answered it with 5.Bb5 in a tournament in Vrnjacka Banja in 1991. Since then I have answered the Austrian Attack (4.f4) with 4... e6 followed by ... Ne7, ... Nd7,... b6 and ... Bb7, obtaining a similar set-up to the game.

5.Be3 Nf6 6.Nf3 e6 7.Be2 0-0 8.0-0 Ne7 9.Nd2 b6 10.a4 a6 11.Qe1 c5

Black's usual way of challenging White's set-up from this structure. Here it proves especially effective because White has plalyed the rather artificial 9.Nd2.

12.Qf2 Bb7 13.Bf3 Qc7 14.a5 cxd4 15.Bxd4 b5 16.Bb6 Qc8 17.Rac1 Nd7 18.Bd4

18.Be3 was better, as now Black rips apart what is left of White's center.

18... e5 19.Be3 f5!

The opening of the position proves good for Black as his pieces are better placed. Note that White's king also proves weak, a consequence of 4.f4!

20.g3 exf4 21.gxf4 b4 22.Nd1 Nf6 23.Qg2 fxe4 24.Nxe4 Nxe4 25.Bxe4 Bxe4 26.Qxe4 Qg4+ 27.Kh1 27.Qg2 Qf5 would also have been unpleasant for White.

27... Nf5 28.Qxb4

A suicidal pawn snatch but it is already rather difficult to give White good advice.

28... Ng3+! 29.Kg1

Taking the knight allows 29... Qh3+ followed by 30... Qg3+ and 31... Rf5.

29... Nxf1+ 30.Kxf1 Qf3+ 31.Kg1 Rae8 32.Qd2 Rxf4! 0-1

White has had enough. 33.Bxf4 is answered by 33... Re2 threatening both mate and the queen.

For a period of about 10 years I played nothing but the Modern, but in the late 1980s I started to branch out into other openings. Even eating caviar every day can become boring.

Yet faced with the prospect of having to win my last round game for a GM norm in a tournament in Budapest, I could hardly answer 1.e4 with 1... e5, after which I would get a boring Four Knights or Ruy Lopez. The only chance was the Modern Defence, and this was it's finest hour.

Godena,M - Davies,N First Saturday Tournament, Budapest, May 1993

1.e4 g6 2.d4 Bg7 3.Nc3 d6 4.Nge2

The safe way of introducing the fianchetto line for White, as after the immediate 4.g3 there is 4... Nc6 and if 5.Nge2 then 5... Bg4. After the text move I either play the immediate 4... Nc6, or sometimes 4... a6 5.a4 Nc6.

4... Nc6 5.Be3 Nf6 6.h3 e5 7.dxe5 Nxe5 8.Ng3 0-0

The safe way to play it would have been 8... Be6 9.Qd2 Nc4, but given that I had to win this game I was not afraid of danger.

9.Qd2 Re8 10.0-0-0 b5!?

A pawn for an open file - not a bad deal with opposite wing castling. If White doesn't capture Black gets the c4 square for his knight on e5.

11.Bxb5 Bd7 12.Be2

After 12.f4 my opponent didn't like the look of 12... Bxb5 13.fxe5 Rxe5 14.Bd4 Qe7, which he felt gave me good compensation for the sacrificed exchange. In the post mortem we looked at 12.Ba6!? but then 12... Be6 wasn't clear.

12.... Qb8 13.f4 Nc6 14.Bf3 Qb4

Preparing to move a rook to b8 and threaten mate on b2.

15.a3 Qb7 16.e5 Rab8 17.b3

An alternative way to defend b2 was with 17.Na4, but then Black has 17... dxe5 18.fxe5 Qb5! 19.exf6 Bxf6 20.b3 Rxe3 21.Qxd7 Bg5 and if 22.Kb1 then 22... Rxb3+.

17... dxe5 18.fxe5 Rxe5 19.Nge4 Qa6!

It is less good to play this move after a preliminary exchange of knights on e4. Thus 19... Nxe4 20.Nxe4 Qa6 can by met by 21.a4 after which White's defences hold.

20.a4?

The decisive mistake. White should take this opportunity to exchange on f6, as for the time being Black is forced to recapture with the bishop. After Black's next move it becomes possible to take back on f6 with the queen.

20... Na5! 21.Nxf6+ Qxf6!

The point, after which the latent threats along the long h8-a1 diagonal prove decisive. Perhaps White thought that his next move made the capture with the queen impossible, but a serious disappointment is waiting.

22.Bd4 Qd6!

Ouch! Only now did he see that the intended capture of my rook on e5 is met by 23... Qa3+ followed by 24... Nxb3.

23.Nb1 Rxb3!

KAPOW! White must kiss his castled position goodbye.

24.Bxe5 Qb6! 0-1

White has had enough. The threat is 25... Rb1+, the rook is immune to capture because of the knight fork picking up White's queen and after 25.Nc3 there is either 25... Nc4 or 25... Ra3, depending on Black's mood.

property of the second

Kamsky G - Karpov An Groningen NED

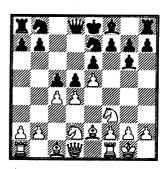

Groningen, 1995

Karpov plays a strange move order in the opening, first Ne7, Bg6 and only then c6-c5. Kamsky opened the center and got a clear advantage as Karpov had problems developing the queenside. However, after 21.Bc7?, Kamsky lost all of his advantage because 21... Qd7! 22. Ba5 (Kamsky had counted on 22. Red1, completely overlooking 22... Rxc7!). Karpov converted his small positional advantage to a pawn with the combination 45... Nxa5!. Everybody expected Karpov to win easily with the extra pawn and the better position, but then Kamsky

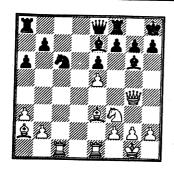

showed terrific persistency defending a worse position. The game continued into the "sudden death" period (rate of play is 2/40 + 1/20 + 0.30 sd) with Karpov still a pawn up. From move 75 the players blitzed out their moves and with both flags hanging a draw was agreed. It is possible that Karpov is still winning in the final position.

For the first time in this tournament Gata joined the post-mortem, obviously delighted by the narrow escape. He forgot the instructions of his father not to analyse with the opponent. The analysis. which was together with Svidler, was very animated and there are people who stated that it was the first time they saw Gata laugh. Even a joke was part of the proceedings, Gata: "We cannot analyse for too long, we have to dance." (In the evening there is the traditional Xmaseve dance party with the participants, seconds, mostsignificant-other-halves and the organisation.)

THE FINAL WORD

First, I've got to blow my team's own hom! Look at the standings in the Near West Division - - CASE at #1! Maybe that doesn't sound big to you but no one can remember us ever beating the Argonne Knights (perennial NW powerhouse) and now it has happened twice this season to

put CASE in a position to actually win the division. CASE has never evened managed second before. Congrats to my teammates!

Well, I guess somebody actually reads this thing because I've had people asking me how soon this issue was coming out. Two major factors affected the release of this issue. One, I decided there was no point in making a December issue since it only would have contained a rating list for the most part. If I was to wait until later in the month then there was a distinct possibility that it would have sat in various inbaskets over the holidays and I had planned to catch up in the beginning of January with my original schedule plans. Second, lightning struck and I recieved my new software making many of the changes you have probably noticed in this issue. From now on the games will be presented on par with some of the best chess publications around the world. Who says we're small time?

While I haven't got all the bugs under control, I am still working on it and the result should be an even better bulletin. How many more times can I say that? Anyway, many thanks to the people who have made the contributions that make this bulletin possible. Mark Siwek for what may well be the best submission of the season. Algis Litvinas for his game (sorry I was too rushed this time to get in all your comments but they will re-surface yet). And of course Charle Ward for once again getting the ratings, etc to me on a most timely basis.

Enough for now, I still have some important matches to prepare for and so do you!
