“I regret to inform you that Kaz Jakstas passed away Thursday”. The brevity of the statement doesn't lessen the weight of sadness from the loss. Kaz has been a high-level Expert in the CICL for at least 30 years, and a fixture in our playoffs many years over that time. Now, as of July 10, 2008, that familiar friend has moved on.

But how to describe him to the rest of the League ? We knew him as one of those pleasant types, down-to-earth, easy to talk to. Seemingly that type that takes things as they come, not taking himself or others too seriously.

Indeed, your roving reporter remembers a playoff encounter that well illustrates the man. I'd been studying the IQP structure and Kaz, being a solid, slow positional type, played right into it. But despite trying my best to wind the themes and get a White advantage, he countered the threats before I could even put them on the board. As the game progressed, there was a slight White space gain, but certainly not enough to hope for a win. He offers a draw and I, being in a cruel mood, glance at his clock and realize he only has a few minutes left to make a dozen moves. I play on, happily finding a way to wind my Knight to a nice post at d5.

Taken a bit a-back, Kaz goes into a think- totally forgetting the clock! I follow along, yet come out of it just enough to call his flag as it dropped. With no change of expression or sign of anger, he simply replied “Well, then I lose,” even with a bit of a smile !?

During a little post-mortem, his attitude is still thoughtful as if the game was still in progress. Teammates came by for an explanation of the turn of events, and I have to admit he simply flagged; the position was drawn. “No, it is lost- I flagged!” he reminded me, matter-of-factly.

An examination of his games reveals a player of over 2150 strength (at our earliest recording). An odd style during the 1990's of pawn-pushing while letting his pieces languish at home made for some exciting play, but a series of such games created a string of losses, often to much-lower-rated players. This dipped his rating down to the low 2100's. But with the turn of the millennium, we also see a major turn in his openings- now the Pawns stay at home and the pieces come out! With the early and often offer of trades, Kaz was always willing to reach simplified positions where he often proceeded to find a tactical finesse to win. If not, he calmly accepted the draw. This strategy improved his rating to well over 2200 which he never again crossed back under.

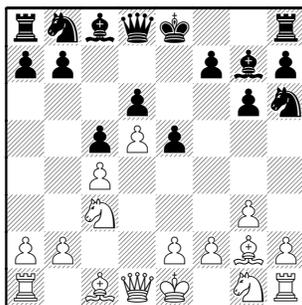

Outside of this chess career, his other accomplishments are not so well known. He achieved a PhD in Electrical Engineering. His workplaces crossed many CICL companies: IIT, Argonne, Bell Labs and Rockwell International, apparently playing on Northrop's team in the 1990's, a brief stint on the Alumni Aces, and finishing his days with the Pawns.

Kaz, rest in peace ! and we'll enjoy the games you've left us, as follows....

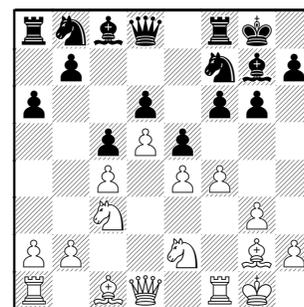

This first game amply illustrates Kaz' chess style

Buerger,E (2024) –
Jakstas,K (2189) [A44]
UOP-Aces, Playoff Rnd 3, 5-15-1999

Highlights of the Fall Business meeting Wednesday, August 27th:

A. Two new teams:

- 1) **DRW Trading** in the East Division
 - 2) **St. Xavier University** in the West
- Welcome to both!!**

B. **Northrop** team folds. We will work on placing interested players with other teams.

C. **St. Charles CC** will field only one team due to impact of matches on club functioning.

D. **BP & Molex** will combine into one Associate Team.

E. **Scoresheet submission by home team captain is now officially mandatory** within two weeks of a match. No fine will be imposed at this time. Violations will be dealt with like any other rules violation.

F. **Club team players who are no longer members of the club are eligible to be alumni.**

G. Proposals tabled:

- 1) Associate Team Revision
- 2) Unrestricted Recruitment

Watch for complete minutes from Jerry Thomas, to be published in September bulletin!!

Regards, President Tony Jasaitis

Thanks to some tough planning and ample support from our members, the off-season was unusually active. And profitable to the tune of \$20,000 for one !

Follow along as we step through the dates and make some observations.

MAY 10, 2008 - The CICL Playoffs

We've chronicled the gamescores and results in the past three issues. But one highlight went unmentioned.

Chess is supposed to be a mind game and so you'd expect chessplayers to be experts at "care and feeding of the brain". Let's decide by gleaning some facts from the following pictures taken on Playoff Saturday.

Any nutritionist will tell you the day should start with breakfast. Any athlete carbo-loads to pack the muscles- the brain's a muscle right ?

Coffee stimulates and keeps us awake in the early hours before noon.

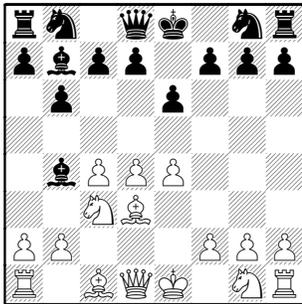

Beer is often the chessplayer's friend – especially when it's free !

JUNE 17, 2008 - The CICL vs New Yorkers' Athletic League

Could we play some other cities using the Internet ? That was the question Norm Hughes posed as we drove home from the Spring Business meeting in April. We had some history with these New Yorkers, so a quick question later and a couple month's worth of emails (read that as "hundreds a month"), Norm had worked it out with World Chess Live. You can get the match details from the June bulletin, but Norm has fully analyzed each game for your enjoyment and edification !

\$20,000 anyone ? Anybody out there willing to collect 20-grand ?? Well to get paid, you have to had played. Your roving reporter had gone to the big one since 1992, but decided there's other priorities for this year (hard to believe, all the same!). But one plucky fella, a Walgreen teammate, entered in the under-1800 section. Each round was some enterprising play, and Mike found himself at 8.5 of 9.0 by the end of the competition !! JULY 19, 2008 - CICL versus Warren Juniors Program

Even as Norm was investigating the possibilities of the Internet match, others were wondering about finding some local competition. The Warren Juniors are budding chessplayers, culled from grades K-8. Originally funded by former CICL member **Jim Warren** and his wife **Helen**, the sponsorship is under the Illinois Chess Association. Participation is by invitation only, given to the most promising youngsters.

Our President, Tony Jasaitis, did the legwork on this one, finding the organizers and parents as very enthusiastic for these prodigies to compete with adults. So the date was set and the place was the Skokie Public Library. Many parents accompanied the kids, the normal brain-feeding foods were there (see Playoff pictures above), and a nice buzz of goodwill filled the small conference room. After introductions (the kids had to tell what grade they're in – the adults told what business they were in, a nice touch), the games began. Their coach, GM Dmitry Gurevich, soon arrived and gave an one-on-one lesson to each pair of opponents after its completion.

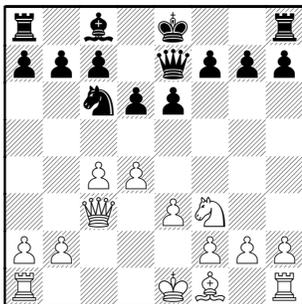

Everyone agreed this event should be often repeated !

 [Tom Friske / Norm Hughes]

1.e4 e6 2.d4 c5 3.c3

3.Nf3 is a simple transposition back to a normal Sicilian Open.

3...Nf6 4.Bg5? Qb6!

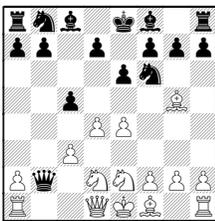

I've played a fair number of games beginning with the first three moves, but White's fourth was a real shock! I tend to learn openings by reviewing GM games – but his quick response, slammed into the board initially made me doubt my experience !

Black can counterattack the dark squares the Bishop has abandoned. He breaks the pin of the Knight while attacking three Pawns (d4, e4, b2).

5.Qc2

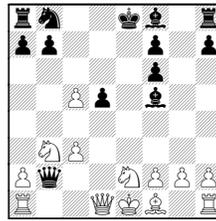

5.Nd2 Qxb2 6.Ne2

6...d5 Norm always goes for this (it's supposed to be the equalizer), but I don't open the center when my pieces aren't ready to rush into the open lines.

(I probably would've have continued 6...cxd4 7.cxd4 Nc6)

7.exd5 exd5 8.Nb3 Bf5 9.Bxf6 gxf6 10.dxc5

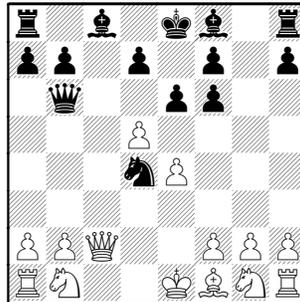

[TF] too messy for my taste

5...cxd4 6.cxd4 Nc6

Of course Black can't be greedy with 6...Qxd4?? 7.Qxc8+

7.Bxf6 gxf6 8.d5 Nd4

The whole point of a normal variation is pressure on the dark squares - White has no intuition about this. He was playing too quickly !

9.Qc3??

Very odd, because he actually paused for several minutes. I almost ignored the blunder to see what kind of stuff he can generate. But I believe bad moves should always be punished, even if in an exhibition setting !

Norm worked out all the gory details—I was aware of the various weaknesses, but never had to explore them over-the-board.

A) 9.Qd2 Bh6! [TF] GM Gurevich was very complimentary about this move I'd named the mainline without detailing it

A1) 10.Qd1 10...Nc2+ -2.27 10...Qxb2 11.Nd2 11...Nc2+;

11.Bd3 (11.Qxf6 Qc1#) 11...Qxa1 12.Nh3 d6 13.0-0

(13.Qxf6?? Nc2+ wins Queen !)

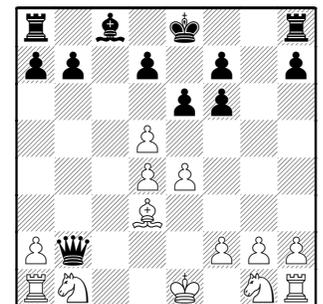

13...Rf8 14.Kh1

B) 9.Qc1 Bh6 10.Nd2 Qa5!

piles on d2 and threatens Nb3

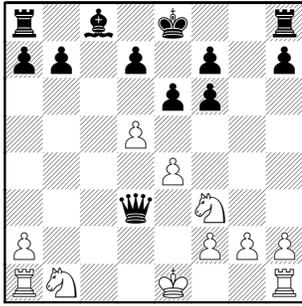

9...Bb4 10.Bd3 Bxc3+ 11.bxc3 Qb2 12.cxd4

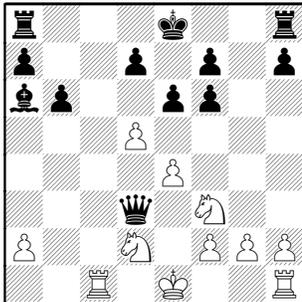

12...Qxd4!

If the Bishop moves off the original diagonal, the Queen takes it. Moving Bishop on the diagonal allows Qxa1 with the Knight pinned and hanging !

30...g5 31.Rc5 Ra4 32.Rc1 f4 33.Kd3
h5

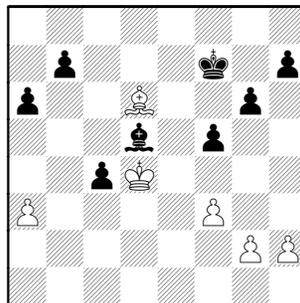

29.Kxd1

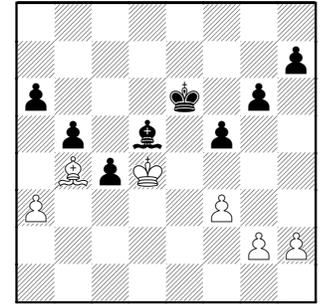

29...c5

Maybe 29...c6 to keep the Pawn solid
until the King can help out

30.Kc2 a6 31.Bd6 c4 32.Kc3 Bd5
33.Kd4

33...Ke6 34.Bb4 b5

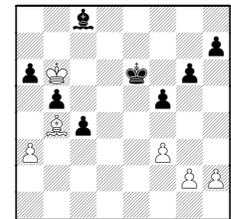

35.Bd2

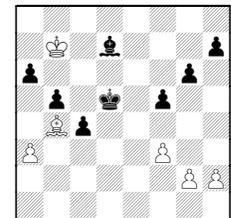

We'll see possibilities for White to win
the Pawn base, so let's evaluate that
strategy now: 35.Kc5 Bb7

(35...Ke5 36.Bc3+ Ke6
(36...Kf4? 37.Kxd5)
37.Kb6)

36.Kb6 Bc8

37.Kc7 Bd7 38.Kb7 Kd5!

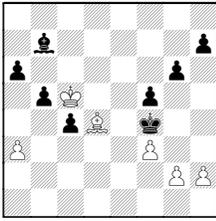

White's King is too far from the action
39.Bc3 a5 40.Kb6 (40.Bxa5 Kd4
escorting the Pawn home) 40...a4

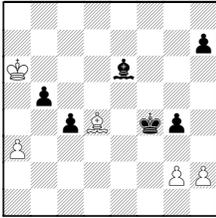

In coming examples, it's always bad.

35...Bb7 36.Bb4 Kf6 I was happy to
see this move. Black understands the
King must invade away from the
current action. 37.h4

Another attempt at a King run...
37.Kc5 Ke5 38.Bc3+ Kf4 39.Bd4

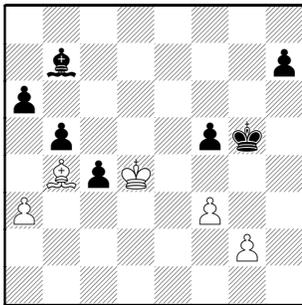

39...g5 40.Kb6 Bc8 41.Kc7 Be6
42.Kb7 g4 43.fxg4 fxg4 44.Kxa6

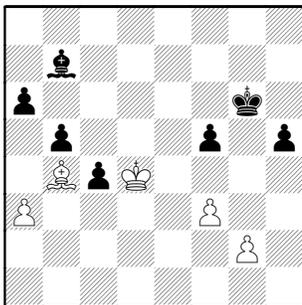

44...Ke4 idea c4-c3, so the raid fails

37...g5 38.hxg5+ Kxg5

39.Be7+ Kg6 40.Bb4 [40.Kc5?? c3]
40...h5

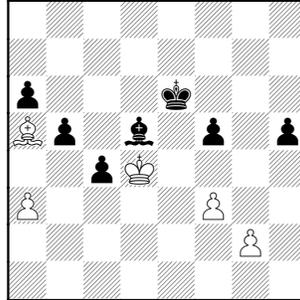

[40...Kg5 41.Ke5 h5 42.Bd2+ Kg6]

41.Be7

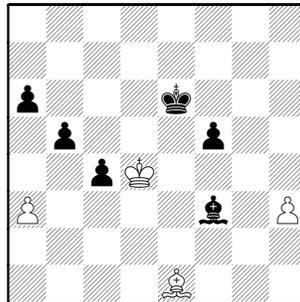

41.Kc5? Kg5 42.Kb6 Bc8 43.Kc7 Be6

44.Kb7 (44.Bd2+ Kh4) 44...Kf4
45.Be1 Ke3

41...Kf7 42.Bg5 Ke6 43.Bd8 Bd5
44.Ba5

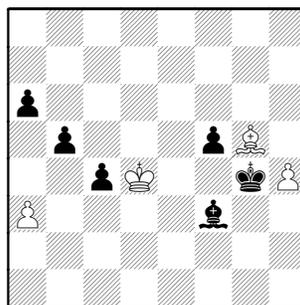

44...h4! Again, Black continues to
make progress. 45.Be1 h3 46.gxh3
Bxf3

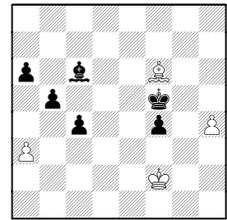

Step one complete - passers on two
sides of the board. **Step two** is
invade to the side the Bishop holds.
Are the passers far enough apart,
however?

47.Bg3 Kf6 48.Bf4 Kg6 49.h4 Kh5
50.Bg5 Kg4

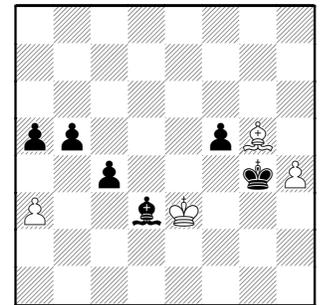

51.Ke5

51.Ke3 Bc6 52.Bf6 f4+ 53.Kf2 Kf5

and the King transfers to the other
side - again, where the Bishop is the
lone defender. Jeremy gets there !

51...Be4 52.Kd4 Bd3 53.Ke3 a5

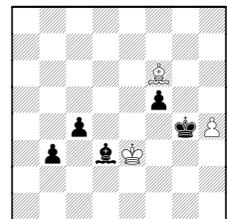

Black has more bullets in his gun
54.Be7

54.Bf6 b4

(54...f4+ makes the King immediately
choose, Black can position his King
accordingly 55.Kf2 b4)

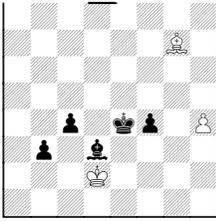

55.axb4 axb4 56.Be7 b3 57.Bf6

57...f4+ 58.Kd2 Kf5!

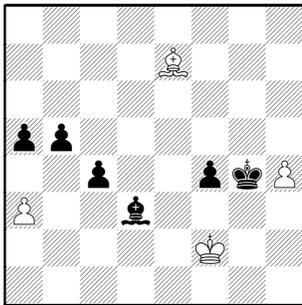

(58...Kg3 59.Be5)

59.Bg7 (59.Bg5 b2) 59...Ke4

idea f3-f2 60.h5 f3 61.h6 Kf4

54...f4+ 55.Kf2

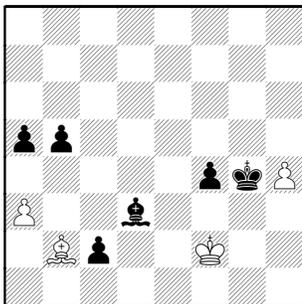

55...c3

I would've kept the King bottled up with 55...Be4 Black has multiple threats, mainly to bring his King to the Queenside

56.Bf6 c2

56...b4 forces the Bishop to remain on the long diagonal, and the King can come through c4 to finish him off

57.Bb2

57...Be4

57...Kxh4?? 58.Kf3 (58.Bc1 Kg4)
58...Kg5 59.Bc1

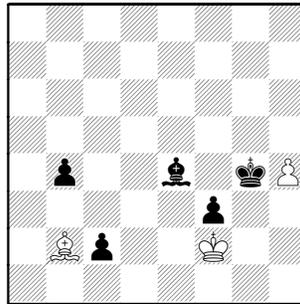

58.Bc1 f3? releasing his control of the dark squares

58...Kf5 is the key re-positioning, when the f-passer won't matter

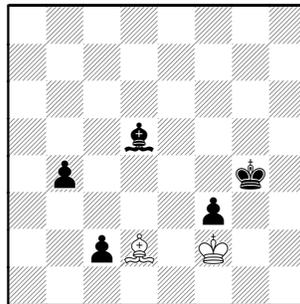

59.Bb2 b4 60.axb4

[NH] 60.h5 Kxh5 61.Bc1 b3 62.Kg3 Bd5 63.a4 Bc6 64.Bb2 Kg5 65.Bc1+ Kf5 66.Kf2

60...axb4

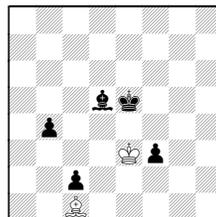

61.Bc1 [61.Ke3 Kxh4] 61...Kxh4
62.Bb2 Kg4 63.Bc1 [63.Kg1 Kg3 64.Be5+] 63...Bd5 64.Bd2

64...b3 Black again gives up the dark squares - the b3 square was where the King was to invade !

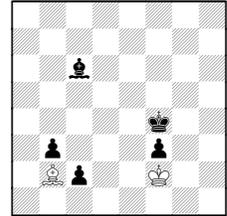

64...Kf5 65.Ke3 (65.Bxb4?? c1Q)
65...Ke5 66.Bc1 (Bc3+)

66...Be4 67.Bb2+ Kd5 once the King reaches c4, Black can sac the f-passer and win

65.Bc1 Kf5

65...Bc6 66.Bb2 Kf4

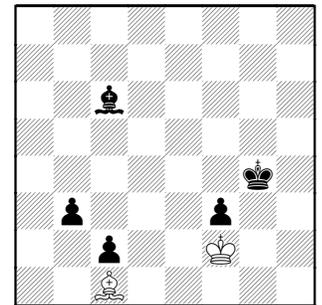

67.Bc1+

(67.Ke1? Ke3 wins 68.Bc1+ Kd3 69.Bb2 f2+ 70.Kxf2 Kd2)

67...Ke4 and invades at c3 or d2

66.Ke3 Kg4 67.Kf2 Bc6!

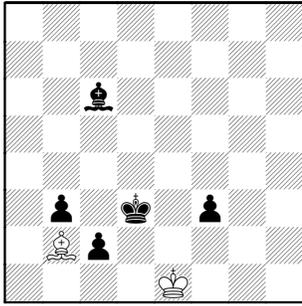

Zugzwang !! In the 64..Kf5 analysis line, everything works if the King has access to c5

68.Bb2

68.Ke3 Kg3;
68.Ba3 Kf4 69.Bc1+ Ke4 and invades to win

68...Kf4 69.Bc1+ Ke4 70.Ke1 Kd3 71.Bb2

Step two complete....Final step is to capture the queening square

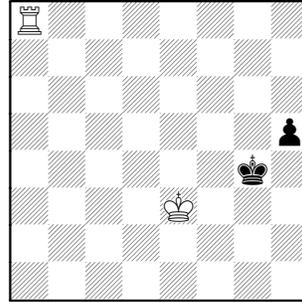

71...Bd5

More forcing is 71...f2+! 72.Kxf2 (72.Kf1 Bg2+! 73.Kxg2 Ke2) 72...Kd2 is curtains

AUGUST 27, 2008 – Fall Business Meeting

The last Wednesday in August is the final planning for a new season and this year was no different. Once the Officer reports are presented, new business is begun.

There were two discussions: One, an addition to the constitution was approved to make submission of gamescores (that's the player's record moves) mandatory. PAGE TWO of each bulletin has the Bulletin/Game Editor's contact details.

The second debate raged to the point we ran out of time to settle the matter. Basically, the core question was: Will the CICL emphasize competition between area Companies, or emphasize team-chess competition regardless of work affiliation ?

A summary of the meeting can be found on page 9 of this issue. The formal minutes and treasurer reports will be published next month.
